

Paper Information Record — Anderson2018

Paper ID: 0025 | Oxford Missing Data Study

General Information

Field	Value
Paper ID	0025
Title	Pathways to Profits: The Effect of Marketing vs. Finance Skills on Business Performance
Authors	Anderson, S. J., et al.
Year & Journal	Strategic Management Journal (working paper)

Data Structure

Field	Value
Data type	RCT cross-section, endline sample (N=611), no FE, heteroskedastic-robust SEs
Observations (N)	611 (Sample_endline==1)
Preferred model column	Main regression, Table (see paper)

Core Regression Model

Field	Value
Dependent variable	Profits3_composite_w1 (composite profit measure, winsorized)
Focal IV	Treatment_FIN (financial training treatment indicator)
Controls	Treatment_MKT, Gender, Age, Children_total, Race dummies, Educ_high, Operating_yearstotal, Activity_Hours, pre_Employees1_composite, FormalReg, pre_Profits3_composite_w1, Industry dummies (Ind2_SIC*)
Fixed effects	None (RCT; industry dummies absorbed via i() notation)
Clustered SEs	None (heteroskedastic-robust)

Simulation Configuration

Field	Value
Key variables (4)	Age, Operating_yearstotal, Activity_Hours, pre_Profits3_composite_w1
MAR control	Distance2training_miles (continuous, complete, correlated with take-up)
Mechanisms	MCAR, MAR, NMAR
Missingness proportions	1%, 5%, 10%, 20%, 30%, 40%, 50%
Methods	LD, Mean, Reg, Iter, RF, DL, MILGBM
Iterations per scenario	30
MAR/NMAR strength	1.5
M (multiple imputation)	5

Baseline Validation

Field	Value
Baseline coefficient	2230.74 (Treatment_FIN)
Baseline SE	1052.65
Baseline p-value	0.0345
Published value	~2231* (p<0.05)
R-squared	See simulation output

Run Log

Field	Value
Full run start	2026-04-12
Full run complete	2026-04-13
Total combinations	17640 (3x7x4x30x7)
Errors	0
DL method	TensorFlow 2.21.0, MLP 32->Dropout(0.1)->16->1, ReLU, Adam lr=0.005, EarlyStopping
MILGBM method	LightGBM 4.6.0, MICE M=5, Rubin's Rules, 30 estimators, max_depth=4
Note	Run interrupted and resumed multiple times; duplicate progress log entries. Summary sheets rebuilt from parsed txt outputs (rebuild_summary=True in generate_deliverables.py).
