

Paper Information Record — Meyer2024

Paper ID: 0020 | Oxford Missing Data Study

General Information

Field	Value
Paper ID	0020
Title	Competing for Attention: Digital Platform Competition and Media Outlet Visits
Authors	Meyer, T.

Data Structure

Field	Value
Data type	Panel outlet-month (digital media, DiD event study)
Observations (N)	4,570 (4,560 regression sample after FE)
Preferred model column	Table 2, Column 4

Core Regression Model

Field	Value
Dependent variable	logTotalVisits (log total digital visits)
Focal IV	afterXVGM (after × VGM treatment interaction)
Controls	post_lav_Visits, post_lav_Visits_VGM, post_IHerfCont, post_IHerfCont_VGM
Fixed effects	metaID (outlet FE) + monthtime (month FE)
Clustered SEs	CRV1 clustered on metaID

Simulation Configuration

Field	Value
Key variables (3)	post_lav_Visits, post_IHerfCont, post_lav_Visits_VGM
MAR control	IHerfCont
Mechanisms	MCAR, MAR, NMAR
Missingness proportions	1%, 5%, 10%, 20%, 30%, 40%, 50%
Methods	LD, Mean, Reg, Iter, RF, DL, MILGBM
Iterations per scenario	30
MAR/NMAR strength	1.5
M (multiple imputation)	5

Baseline Validation

Field	Value
Baseline coefficient	1.1369 (afterXVGM)
Baseline SE	0.4846

Field	Value
Baseline p-value	0.020
Published value	afterXVGM positive significant (Table 2, Col 4)

Run Log

Field	Value
Full run complete	2026-04-11
Total combinations	13,230 (3x7x3x7x30)
Errors	0
DL method	TensorFlow 2.21.0, MLP 32->Dropout(0.1)->16->1, ReLU, Adam lr=0.005
MILGBM method	LightGBM 4.6.0, MICE M=5, Rubin's Rules, 30 estimators, max_depth=4
